

SAVE THE DATE!!

Does your child display any of the following behaviors?

- Impulsivity
- Inappropriate social behavior
- Lying or stealing without any reason
- Poor reasoning skills
- Inability to learn from consequences
- Forgetfulness/short term memory loss
- Temper Tantrums
- Time/space confusion

Are they smaller than other kids their age?

Do they have any learning disabilities?

Experience any sensory problems?

Does it feel like nothing works to change challenging behavior?

Your child may have a Neurobehavioral Disability!

What is that?

How is it different from other diagnoses?

What can we try that's different than what we've been doing?

On March 12, 2015 we will answer these questions!

Flagstaff Medical Center's McGee Auditorium

5:30 – 6:30 p.m.

Preregistration would be nice, but is not required

To register or for more information, contact jrbowman@fasdna.org or call 928-853-2688

Presented by FASDNA

support from the FMC Foundation & United Way of Northern Arizona
